

LineUp Manager - Version 3.1

Create and maintain a baseball lineup, including field positions by inning and batting order! *Lineup Manager* is an Excel spreadsheet developed to help coaches create and manage their team's lineup. The spreadsheet even warns against duplicate batting order and position assignments.

New in Version 3.1 is the addition of a Team Roster and Batting Stats worksheets. LineUp Manager 3.1 now also supports a 21 game season and a 16 player roster.

Detailed instructions can be viewed under the **HELP** tab.

The Lineup Manager website can be found at: www.attard.org/lu_manager
